Sorry, I forgot. POS is approx 54 52.38N 9 43.35E WGS84 I actually dont have a more exact pos as I got a little bit lazy about exact Positions since I am using a sideimaging sonar. Wreck is a Tjalk of 20-25m length. Sry!

Hope it is OK to write in English on this site! We have been Diving this wreck in July 2007. Wooden sailing ship, about 20-25m. Big Torsk at wreck! Wreck decay is advanced like at wreck of Hans (Waldau), nice plumose anemones, dark ground.
